

Rahul Lal

Career Objective/Personal Profile

I'm seeking an entry level IT based in Auckland. I have 4 months' experience as a Full Stack Web Developer to complement my diploma courses in software/web development. I am familiar with several computer software programmes which include JavaScript (programming language & derived tools), GitBash/GitHub and have also worked on several personal projects in applications.

Most of work experience derive from my employment at Carl's Jr. which were the building blocks to able to work well within a team, learn how processes work while developing an excellent eye for detail, trouble-shoot and problem-solve effectively. I've also worked as a production worker within factory settings.

Key Skills

- Tech-savvy with good attention to detail
- Team player and independent worker
- Logical and methodical thinker
- Problem-solver with ability to trouble-shoot

Computer Power Plus

Interests

I pursue to more fit and active by working out at the gym which I greatly enjoy the process. Prior to gym workouts, I trained in Okinawa Kan Goju Ryu Karate, where rose up to the rank of 1st degree Black Belt (Shodan). I also cook mainly healthier, low-calorie foods. I also listen to music while doing tasks and when I'm relaxing and I'm also into pop culture.
